

TARIFF PICTURES.

Earnings of factory employes in Savannah, Ga., averaged \$3.00 a week in 1880, but had grown to \$5.50 in 1890. The assessed valuation of the city in the meantime grew from \$300,000 to \$1,500,000.

That is the kind of Tariff oppression from which Georgia has suffered.

WHY THEY HOLD ON.

Neoplatonism ought to make a very great lot of difference to the members of the Legislature where the seat of Government may be located. Few of them will ever again be called upon to undergo the hardships and privations of a legislator's life.

THE FLAG DOWN AT HONOLULU.

Mrs. Hildred. —The hauling down of the Stars and Stripes at Honolulu by order of Mr. Blount of Georgia is a sinister incident. It is the abandonment of the American policy and a degradation. It is an insult to the progressive American spirit. It pleases reactionaries and wags. Mr. Blount was not understood to be a revolutionist, but he has interfered with and spoiled what had been accomplished in securing for us the richest, fairest, most imperially situated islands in the Pacific Ocean. They are prizes that any Nation might be glad to grasp. The second administration of Grover Cleveland is the first since the foundation of our Government was laid under which this debase and shrinking from a great duty could have happened. President Cleveland wrote a letter to the Provisional President of the Sandwich Islands saying:

I HAVE made choice of James H. Blount, one of our distinguished citizens, as my Special Commissioner to visit the Hawaiian Islands to make a report to me.

This is the most extraordinary of all the effusions of egotism: "I have made," "my special commissioner," "to make a report to me." This is a good deal above the average assumption of monarchs. It is an excessive specimen of the royal style. Mr. Blount, it will be noted, is a personal representative of the President, and he treated the people to the spectacle of hauling down the American flag—an act at once of surrender and insolence. See the story, dated Honolulu, April 7.

The hour for hauling down the American flag had been fixed for 11 o'clock. The streets had begun to fill as early as 8 o'clock in the morning, the street corners being thronged with knots of white soldiers, who discussed, not without some emotion, it must be said, the outlook for action of the American Commissioner.

A great crowd assembled on the morning of April 1st in front of the Government Building. The full force of the provisional army was present. At the command of Mr. Blount a bugle gave the signal and the American colors came down. The descent of the flag was watched in deep silence. The chief danger apprehended here is that of the Japanese interference, either by force or at the application of Japanese subjects, or the Hawaiians themselves.

Honolulu, always a hotbed of rumors, was startled on the same night on which the proposed hauling down of the Stars and Stripes became known. At the report that the Queen anticipated such action and would apply to the Captain of the Japanese cruiser, the Japanese, against the provisional government, and assistance to restore her to the throne.

It would be just like England to play the Japs in this matter. The Americans at Honolulu are trying to make the best of it, and it looks to them as though the Southern Confederacy was in possession of the United States, and as if Cleveland had utterly Magnagruined and abandoned the better part of the old Democratic doctrine and executive policy, illustrated in the Louisiana and Alaska purchases, the annexation of Florida and Texas, and the conquest and partial appropriation of Mexico. The Hawaiian flag is on all public occasions blowing out in the South, the section that elected Cleveland and the Democratic majority of both Houses of Congress.

Over the speaker's stand hung the Confederate flag which was carried through the war by the blue and gray army and the adoption of the battle-flag by the Government. It was then replaced by a later. This copy was then displayed at Appomattox, was also displayed over the stand. Each of the States represented in the States that formed the late Confederacy.

A Popular Remedy for Colds.

J. B. Copeland of Maryland, Penn., who has been engaged in a long business in Kansas, New Jersey, Florida, and Pennsylvania for the past sixteen years, says: "Chamberlain's Cough Remedy is the selling cough medicine I have ever handled." People who use this remedy are so much pleased with it that they recommend it to their friends and acquaintances. There is nothing better for a cold. It relieves the throat, preventing any tendency toward pneumonia. It is a powerful and safe medicine for children. Fifty cent bottles for sale by Power & Reynolds, druggists.

MAHONEY's injunction against the use of ardent spirits is so well obeyed, even at this late date, that it is an extremely rare sight to see a drunken man in a hotel. A lady who has been making a tour of Egypt says that during a long stay in Cairo none of her party saw an intoxicated man.

There are two classes of fools which, in spite of fatalities, seem never to decrease. They are the didn't-know-it-was-loaded fools and the don't look who walks on railroad tracks. The last fatality in the latter class occurred near Woodburn, on the L. and N., where George Phelps, a farmer, was knocked to kingdom come.

AUDITOR ACKERMAN has made a report showing that the building of the World's Fair has already cost \$15,000,000, twice the sum expended for the Paris Exposition, and more must yet be paid out. The snow storm and hard weather necessitated an extra expense of \$12,000. There is at present a cash balance of \$628,269 and \$5,361,283 due on contracts.

A REPUBLIC.

That is What Cuba May Yet Become.

A Full-Fledged Revolution Developing in New York City.

The Project is One of Long Standing—Action to be Taken Soon—Election of Deputies Delegates Approved by an Assembly of Cuban Exiles.

New York, April 15.—In New York brewing what may develop into a revolution in Cuba within the next few months. The project is one of long standing. The possibility of its elmsa within a short time is the result of the elections in Cuba, which were unsatisfactory to the people there and to Cuban patriots in America.

Instead of starting an expedition from Key West or Tampa, Fla., it is probable that if one is undertaken it will be organized here, if not actually started from this city. In Hardman hall, Fifth avenue and Nineteenth street, was organized Monday evening the New York Cuban Revolutionary party, its avowed purpose being to uphold the movement for independence and a lasting republican form of government in Cuba.

By a unanimous vote the election of the party's delegates in Cuba was approved, after which the situation in the island was discussed at great length. The speakers were Estrada Palma, president of Cuba, Juan Praga, president of the new branch of his party; Delegate Marti, Carlos Azonot, Secretary Quenda and Treasurer Benjamin J. Gueza.

While, of course, no open declaration was made that it was contemplated to start a revolutionary expedition to Cuba in the near future, that idea was clearly conveyed by statements that money in plenty had been collected to send men, arms and ammunition. At the moment it should be decided that extreme measures were the only resort. Men enough to fit out not one, but five or six or seven expeditions, the arms and accoutrements are within reach, it declared.

Delegate Marti and the counsel of direction alone stand between the government and immediate insurrection. When they are convinced their plans are perfect, and there can be no chance of failure, as in the ten years' revolution ending in 1878, then the word will be given, and under the same general who led the insurgents fifteen years ago, the armies of the Cuban patriots will begin their fight for absolute independence.

The party is growing, and there are now ninety-seven clubs located in various parts of the United States. "Recent events in Cuba," said Secretary Quenda, after Sunday night's meeting, "indicate that revolution is unavoidable. The elections were so corrupt and the treatment of the home rule party so contemptible that the Cubans have come to the conclusion that there is no hope for a peaceful settlement of the question."

"The main difficulty will be to properly arm our forces. It will not be necessary to purchase arms outside of Cuba. They can be obtained on the island now, and when the time comes our army will be armed as it never was before."

"These reports recently sent from Key West about the starting on an expedition are false. With what object they were sent out I know not, unless it was a move on the part of the sugar planters."

Treasurer Gueza said: "The party has plenty of funds, and when the time comes there will be no lack of money to carry on the revolution. The war may start at any time. It may come next month, for the matter of that, but we are prepared for it."

"These reports of expeditions from Key West that have been sent out are malicious falsehoods. Our party has been fitting out an expedition to start from Key West or anywhere in that vicinity, and for what purpose the stories have been circulated I do not know."

The Cubans here believe that in the possession of their island they can put on a good, solid war footing in ten years. They estimate the cost of the island at \$40,000,000 per year. This amount they propose to invest in a navy, calculating that at least purchase ten cruisers or battleships each year.

To Oppose Home Rule.
LONDON, April 15.—Col. Hon. C. P. Dwyer, who was a member of the late parliament from the district of Drogheda, Yorkshire, announces the formation of a corps of gentlemen volunteers in Yorkshire, with the intention of joining the Ulster Unionists in armed opposition to Irish home rule. Other news of a military character in relation to Glasgow reports that the Orange lodges in that city are storing rifles and bayonets, with the intention, it is presumed, of aiding the Orangemen of Ulster to battle against Irish home rule.

The Foreign Minister at London.
NEW YORK, April 15.—A morning paper said Tuesday that, despite the efforts of the Mutual Maritime Protection union, the 100 German mailships now on their way to this country as passengers aboard the steamship Trave, will not be debarked from landing. This is Secretary Carlisle's decision.

Long Mourned as Dead.
NEW BRUNSWICK, N. J., April 15.—Irvin S. Merrill, whom every one had given up for dead, arrived in this city to visit his sisters. He is now in his thirty-four years. He served in the civil war, and the man who survived brought news to relatives here that he had perished at Vicksburg.

THE SUN'S FIRES.

Great Disturbances Were Seen by the Aid of the Telescope.

New York, April 15.—The Herald's special from Valparaiso says: Observations of the total solar eclipse were taken Sunday at Mina Aria, Harvard College station. The weather was clear for all phases of the eclipse, with no passing clouds and no haze to mar the observation. The results will be satisfactory to the highest degree. The corona seen Monday morning, generally speaking, resembled the corona of 1874. There were four streamers, two of which had a length exceeding the sun's radius, or stretching out more than four hundred and thirty-five thousand miles.

Several dark rifts were visible, extending directly outward from the moon's limb to the utmost limit of the corona.

During the total eclipse several flaming solar prominences attained great distinctness and brilliancy.

The moon appeared of almost ink darkness, with only enough illumination at the edge of the disk to make its rotundity conspicuous, while from behind the orb streamed out on all sides the radiant filaments, beams and sheets of fiery light, which formed an irregular, star-like decoration with the black lunar globe in its core.

During the totality the distinctness and brilliancy of several prominences were pronounced. One of these was 800 miles in height. As the eclipse progressed the temperature of the air fell considerably below its normal. The lowest reading of the thermometer occurred after totality.

The eclipse observations showed conclusively that the sun is now far from being quiescent, but is in a state of great disturbance.

THE KINETOGRAPH.

With It You Can See A Man A Thousand Miles Away—Edison's Latest.

CHICAGO, April 15.—Thomas A. Edison has finally announced the nature of his individual exhibit. It is the kinetograph, the last of a series of wonderful inventions, displayed in connection with the most versatile group of photographic ever brought together. It is to the eye what the photograph is to the ear, a mechanical retina, which stores away a living picture to be reproduced in all its action, every movement faithfully shown at any time and in any place.

With the kinetograph it is possible to show in Chicago Chancery Dewey delivering a speech aboard the flagship Chicago in New York harbor—not a photograph of arrested action, but the living man, his every gesture, the play of expression on his face, the movements of his lips. It will transmit and reproduce motion of any kind for any distance.

BLOODTHIRSTY CONVICT.

He Kills One of His Fellowes and Sins Three Others.

AUBURN, N. Y., April 15.—John Johnson, known as the "Bliss Nigger" from Clyde, committed murder right and left among the convicts of Auburn prison Monday morning. Johnson worked in the broom shop. Suddenly, for no reason as yet determined, he grabbed up a huge knife used in cutting broom corn, and attacked Charles Peck, a fellow convict from West Chester county.

Peck fell dead in his tracks. The room was soon in an uproar, but Johnson with the ferocity of a demon fatally stabbed the another convict and wounded two others. The confusion was great, but a keeper finally succeeded in shooting Johnson.

Johnson was sentenced to ten years for assault in 1885, and sent up again for four years last January.

TO DIVIDE IRELAND.

The Ulsterites to the Left Out of the Home Rule Plan.

LONDON, April 15.—An important statement was made Monday in regard to the Irish home rule bill. It is to the effect that when the bill reaches the second reading a large section of the Ulster radicals will support a proposal to divide the counties of Londonderry, Antrim, Down and Armagh, in the province of Ulster, under the management of the Ulster unionist element is strongest and the antagonism to Irish home rule strongest. The proposition means the division of Ireland, and the Irish legislature created under it would represent only a portion of the country.

Mrs. Houlahan on Trial for Murder.

NEW YORK, April 15.—A special term of the court of oyer and terminer opened here Monday, with Judge Wright, of Oswego, presiding, for the trial of Mrs. M. Houlahan on a charge of murder in the first degree in killing Carl Bauer last June. The district attorney will be assisted by two other counsel, and the prosecution means to offer evidence to the jury that the case is one for a capital sentence. In this event Mrs. Houlahan will be the first woman to be electrocuted in this country, unless the bill abolishing capital punishment after next September in this state should become a law in the meantime.

They Let the Baron Go.

LONDON, April 15.—Sir George Manston, who sits in the house of lords as Baron Hastings and who was convicted March 15 of having insulted a girl in Regent's park, and was sentenced to pay a fine of £50 or to be imprisoned for three months appealed against the sentence passed upon him by the court. The court quashed the indictment and the baron was discharged.

Canada's New Governor-General.

OTTAWA, April 15.—The appointment is now definite that the earl of Aberdeen has been appointed governor-general of Canada. Although he will not reach Ottawa until the 15th of May, he will not reach Ottawa to replace Lord Stanley until September, owing to his desire to allow Lady Aberdeen to prosecute her work for the Irish exhibit at the World's fair.
